

Amendments to the Claims:

The following listing of claims will replace all prior versions, and listings, of claims in the application:

1. (Currently Amended) A protective layer thermal transfer sheet, comprising:
 a substrate sheet;
 a release layer ~~and, formed provided~~ on at least a part of one side of the
substrate sheet;
 ~~in the following order, a release layer, a protective layer provided on the~~
~~release layer;~~ and
 an optionally an adhesive layer provided on the protective layer;
 wherein:
 ~~said the~~ release layer ~~containing~~ contains a resin and a filler;
 the release layer has ~~and having~~ a roughened surface;
 the filler is present in the release layer at a PV ratio of from 0.05 to 0.5% by
weight so as to provide an image with a gloss of from 0 to 50.0 when the protective layer is
transferred from the protective layer thermal transfer sheet onto the image;
 the PV ratio is a ratio of a solid content of the filler in the release layer to a
solid content of a binder in the release layer; and
 the gloss is measured at an angle of incidence of 45 degrees with a glossmeter.
2. (Original) The protective layer thermal transfer sheet according to claim 1,
wherein the filler has an average particle diameter of 1 to 20 μm .
3. (Cancelled)
4. (Currently Amended) A matted print, comprising:
 -a sublimation dye transferred image; and
 , a protective layer provided on the a surface of the image;

wherein fine concaves and convexes are transferred onto a surface of the a
protective layer ~~having in its surface fine concaves and convexes which has been transferred~~
using the protective layer thermal transfer sheet according to claim 1.
